

Gasification Project Questionnaire
Questions for Analysis and Developing a Proposal

1. Cities or regions where facilities are to be located: _____

2. Populations served by each facility: _____

3. Composition, quantities, and characteristics of the waste: _____

4. Will collection be included? _____
5. Will medical waste treatment and collection be included? _____
6. Will agricultural and Green Waste be collected and included? _____
7. Quantities of used auto and truck tires? _____
8. Tipping Fees for Collection of MSW, C&D, special waste? _____
9. Tipping Fee for used auto and truck tires? _____
10. Electricity rate to be paid for electricity produced by the facility: _____
11. Do you want design requirements for MSW and Hazardous Waste Landfills? _____

12. Do you want design requirements for Sorting Facilities? _____
13. Do you want design requirements for medical waste processing facilities? _____

14. Do you want design requirements for gasification waste to energy facilities? _____

15. We typically include a leachate/water treatment facility in the design of the facilities to treat leachate from the trucks, sorting facility, and landfill, wastewater from the sanitary facilities, cleaning water, and either ground water or collected surface-water runoff. Do you want design requirements for the leachate/water treatment facility? _____
16. We have written solid and hazardous waste management regulations for more than 30 states and countries. Do you want draft solid and hazardous waste management regulations? _____
17. Do you want to include composting facilities for green waste, agricultural waste, and sewage sludge? If so, do you want design requirements? _____

18. Do you have funding available for this project?
- Yes - Source of funding: _____
- No
19. What is the anticipated timeline for this project? _____

20. What governmental department will be responsible for reviewing and approving this project? Please provide their contact information: _____
